## I CLAIM

- 1. A manufactured chimney cap comprising an integrated flu pipe extending from a pitched top plate secured to a cap frame via a rim, and being encased in a weather-proof aesthetically pleasing material.
- 2. The chimney cap of Claim 1 wherein said integrated flu pipe mates with an existing flu pipe in a chimney.
- 3. The chimney cap of Claim 1 wherein said integrated flu pipe is affixed to said pitched top plate so as to form a single unit.
- 1 4. The chimney cap of Claim 1 wherein said top plate has an outer lip around its perimeter.
- 5. The chimney cap of Claim 1 wherein said top plate pitches downwardly from said integrated flu pipe to said outer lip
- 6. The chimney cap of Claim 5 wherein said outer lip is compressed between said cap frame and said rim both to secure it to the cap frame and to form a weather resistant barrier.

- 7. The chimney cap of Claim 6 wherein a long life caulking is applied over a joint formed between said outer lip and said rim to divert moisture off said top plate and over said rim.
- 8. The chimney cap of Claim 7 wherein said rim and cap frame are encased in a waterproof decorative material.
